WHAT IS ASK NAO?

ASK NAO (Autism Solution for Kids) is driving special education into the future with a user-friendly robotic assistant to support teachers with in-class tasks and help children with autism reach new levels of greatness.

NAO

NAO is an interactive robot, acts as the perfect bridge between human and technological worlds.

PREDICTABLE

Reduced natural anxiety.

TIRELESS & JUDGMENT-FREE

Can persistently teach, prompt, and encourage students.

INTERACTIVE

Verbal, tactile and visual interactions.

EVOLUTIONARY

Customize applications based on each child's individual profile.

APPLICATIONS

Numerous fun, educational applications to help kids reach their learning goals.

PROVEN METHODS

Based on various approaches and models (ABA, PECS, TEACCH, DENVER, SCERTS).

CUSTOMIZABLE LIBRARY

Develop social and learning skills by positively stimulating kids based on their interests with constant new applications.

AUTONOMY

Helping kids grow their confidence and move toward greater independence.

INTERFACE

Online user friendly interface to simplify teacher's in-class requirements including routine note taking.

LEARNER ORIENTED

Customize educational sessions for individualized and targeted learning.

PROGRESS TRACKING

Monitor progress through data collected by NAO during sessions and graph results.

COMMUNICATION NETWORK

Creates channels for teachers, therapists, and parents to better assist the child.

It is the joy that NAO provides that so enhances learning and motivation in the school. These interactions have supported our children with autism to make huge strides, both socially and academically. It is a real privilege to witness and be part of.

IAN LOWE

HeadTeacher at Topcliffe School, Birmingham,
Beta School UK
